Wabash County Hospital Selects The Hagerman Group to Manage New Replacement Hospital Project.

WABASH - The Hagerman Group has been selected to provide construction management services on a \$30 million construction project for Wabash County Hospital in Wabash, Indiana.

The scope of work includes construction of a 75,000 square-foot replacement hospital. In addition to the replacement hospital, a 35,000 square-foot Medical Office Building will also be included in the project.

“We recognize how vital this hospital is to its community and are proud to have been selected by the Wabash County Hospital Board of Trustees and its building committee to construct their replacement hospital. This new facility will serve patients of the hospital and surrounding communities for generations to come,” said Mark Hagerman, CEO of The Hagerman Group.

The project is still in the early stages of a long process. The hospital and building committee are moving forward cautiously in light of the economy. They are not only monitoring the economy closely, but also the hospital operations.

Founded in 1908, The Hagerman Group consists of 3 outstanding construction firms, Hagerman Inc., GDH and Hagerman Construction Corporation with offices in Fort Wayne, Indianapolis and Lafayette.
